- **Ruggedized Aluminum Construction**

Easily Achieve Great Video

Your path to professional looking video and great story telling starts with quality lighting.

With 3 point lighting, you can effectively and easily illuminate any subject for cinematic looks and creative control.

Never miss a shot with 4 hours of run time and having more light means the ability to modify, control and match prevailing lighting conditions. Single-Point source gives pleasing and natural results with a single shadow unlike panels that are pixelated.

Built for reliability Frezzi ruggedized products work when you need them and in any weather condition. They are used by virtually every major TV station and network.

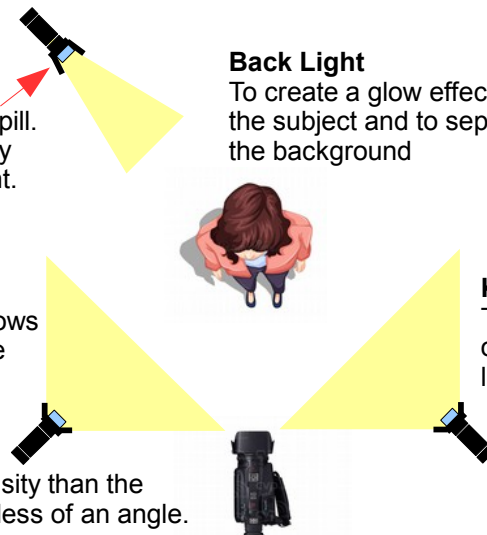

Barn Doors
Shape and control light spill. Illuminate only what you want.

Back Light
To create a glow effect on the edges of the subject and to separate them from the background

Fill Light
To fill in shadows created by the Key Light.

Key Light
This is your main or Key Source to light the subject.

Lower in intensity than the Key light and less of an angle.

Easily & Quickly Capture Quality Images To Help Tell Your Story

Frezzi®
